This journal is printed on acid-free paper.

Contents of Volume 126

Number 1, November 1990

Study of Catalytic Properties of Aluminophosphates with Different Phase Compositions
O. V. Kikhtyanin, E. A. Paukshtis, K. G. Ione, and V. M. Mastikhin 1

Formation of $Al_2(MoO_4)_3$ and MoO_3 Phases Induced by Phosphate in Molybdena–Phosphorus Catalysts
R. López Cordero, S. López Guerra, J. L. G. Fierro, and A. López Agudo 8

Microcalorimetric Study of the Interaction of CO, O_2, and CO + O_2 with Pt/SnO_2 and SnO_2 Catalysts
N. D. Gangal, N. M. Gupta, and R. M. Iyer 13

Characterization of Acid Sites in Pentasil Zeolites by X-Ray Photoelectron Spectroscopy
Ramesh B. Borade, Alain Adnot, and Serge Kaliaguine 26

The Surface Characteristics Required for Isosynthesis over Zirconium Dioxide and Modified Zirconium Dioxide
Nancy B. Jackson and John G. Ekerdt 31

Isotope Studies of the Effect of Acid Sites on the Reactions of C_3 Intermediates during Isosynthesis over Zirconium Dioxide and Modified Zirconium Dioxide
Nancy B. Jackson and John G. Ekerdt 46

Adsorption and Catalysis on Silicon-Modified W(110) Surfaces
Allen G. Sault and D. Wayne Goodman 57

Pt Particles from the $Pt_{15}(CO)_{30}^{2-}$ Cluster Compound
B. E. Handy, J. A. Dumesic, and S. H. Langer 73

Application of Equilibrium Analysis to a Fischer–Tropsch Product
G. W. Norval and M. J. Phillips 87

Reaction Network and Kinetics for the Catalytic Oxidation of Toluene over V_2O_5
Jingmin Zhu and S. Lars T. Andersson 92

Quantitative Detection of Reactive Hydrogen on MoS_2/γ-Al_2O_3 and on γ-Al_2O_3
L. Jalowiecki, J. Grimblot, and J. P. Bonnelle 101

Comparison of Oxidation of Carbon Monoxide on Superconducting and Insulating Y–Ba–Cu–O Catalysts
Istvan Halasz, Alan Brenner, Mordecai Shelef, and K. Y. Simon Ng 109

The H/D Exchange and Hydrogenolysis of Propane on Alumina-Supported Nickel Catalyst
Hami Öz and Tino Gäumann 115

One- and Two-Component Diffusion in Zeolite ZSM-5. I. Theoretical
Waqar R. Qureshi and James Wei 126

One- and Two-Component Diffusion in Zeolite ZSM-5. II. Experimental
Waqar R. Qureshi and James Wei 147

Studies of $Pt–Sn/Al_2O_3$ Catalysts Prepared by Pt and Sn Coevaporation (Solvated Metal Atom Dispersion)
Yong-Xi Li and Kenneth J. Klabunde 173

Ethylene Addition to CO Hydrogenation over Sulfided Ni, Rh, and Ru
Steven S. C. Chuang, Shyh-Ing Pien, and Chien Sze 187

Zeolites as Base Catalysts: Condensation of Benzaldehyde Derivatives with Activated Methylenic Compounds on Germanium-Substituted Faujasite
A. Corma, R. M. Martín-Aranda, and F. Sánchez 192

Solid Base-Catalyzed Reaction of Nitriles with Methanol to Form α,β-Unsaturated Nitriles. I. Conversion and Selectivity
Hideki Kurokawa, Tatsuro Kato, Wataru Ueda, Yutaka Morikawa, Yoshihiko Moro-Oka, and Tsuneo Ikawa 199

Solid Base-Catalyzed Reaction of Nitriles with Methanol to Form α,β-Unsaturated Nitriles. II. Surface Base Property and Reaction Mechanism
Hideki Kurokawa, Tatsuro Kato, Tetsuo Kuwabara, Wataru Ueda, Yutaka Morikawa, Yoshihiko Moro-Oka, and Tsuneo Ikawa 208

The Activity and Structure of Methanol Synthesis Catalysts Derived from Silver, Copper, and Cerium Alloys in Relation to Frost's Hypothesis
Elizabeth A. Shaw, Trevor Rayment, Andrew P. Walker, J. Robert Jennings, and Richard M. Lambert 219

Coking of Pt–Ir/Al_2O_3 and Pt–Re/Al_2O_3 Catalysts in Different Pressures of Cyclopentane
J. Barbier, E. Churin, and P. Marecot 228

Effects of Preparation Variables of Supported-Cobalt Catalysts on the Selective Hydrogenation of α,β-Unsaturated Aldehydes
Yuriko Nitta, Yoshifumi Hiramatsu, and Toshinobu Imanaka 235

A High-Resolution Electron Microscopy Investigation of TiO_2(B)-Supported Vanadium Oxide Catalysts
L. Reine Wallenberg, Mehri Sanati, and Arne Andersson 246

Anomalous Behavior of Cumene Cracking in Small-Pore Catalysts
Dady B. Dadyburjor and Akshay Bellare 261

Ga_2O_3/HZSM-5 Propane Aromatization Catalysts: Formation of Active Centers via Solid-State Reaction
Geoffrey L. Price and Vladislav Kanazirev 267

Carbon Gasification by Group VIII Metal Catalysts
Mark E. Vincett, John A. Tsamopoulos, and Carl R. F. Lund 279

The Role of Sodium Carbonate and Oxides Supported on Lanthanide Oxides in the Oxidative Dimerization of Methane
Youdong Tong, Michael P. Rosynek, and Jack H. Lunsford 291

Catalytic Activity and Si, Al, P Ordering in Microporous Silicoaluminophosphates of the SAPO-5, SAPO-11, and SAPO-37 Type
Johan A. Martens, Piet J. Grobet, and Peter A. Jacobs 299

Note

Determination of C/H Ratios in Coked Catalysts Using a Portable Neutron Source
C. L. Koon, D. R. Acharya, and R. Hughes 306

Letters to the Editors

Comments on "Hydrogen Spillover through Gas Phase Transport of Hydrogen Atoms"
M. S. Spencer, R. Burch, and S. E. Golunski 311

Hydrogen Spillover through Gas Phase Transport of Hydrogen Atoms. Reply to M. S. Spencer, R. Burch, and S. E. Golunski
E. Baumgarten, C. Lentes-Wagner, and R. Wagner 314

Number 2, December 1990

Kinetics and Characterization of Bismuth Molybdate Catalysts. I. A Gradientless Partial Oxidation Reactor
P. M. Burban, G. C. A. Schuit, T. A. Koch, and K. B. Bischoff 317
Kinetics and Characterization of Bismuth Molybdate Catalysts. II. Reaction Studies over Various Bimolybdates
P. M. Burban, G. C. A. Schuit, T. A. Koch, and K. B. Bischoff 326
The Nature of the Iron Oxide-Based Catalyst for Dehydrogenation of Ethylbenzene to Styrene. 1. Solid-State Chemistry and Bulk Characterization
M. Muhler, J. Schütze, M. Wesemann, T. Rayment, A. Dent, R. Schlögl, and G. Ertl 339
Interaction of 1-Butene and *n*-Butane with a Sulfate-Promoted Iron Oxide
Jae S. Lee, Mi H. Yeom, and Doo S. Park 361
Selectivities for Hydrocarbon Reactions on SMSI Titania-Supported Platinum Formed by High-Temperature Reduction
J. K. A. Clarke, R. J. Dempsey, T. Baird, and J. J. Rooney 370
Pt/ZnO Catalysts: Spectroscopic and Catalytic Evidences of a Ligand Effect as a Consequence of PtZn Alloying
Flora Boccuzzi, Anna Chiorino, Giovanna Ghiotti, Francesco Pinna, Giorgio Strukul, and Roberto Tessari 381
Catalyst Characterization by a Probe Reaction: The Number of Active Hydrogen
Eduardo Choren, José O. Hernández, Arnedo Arteaga, Geomar Arteaga, Helí Lugo, Marcos Arraez, Andrés Parra, and Jorge Sánchez 388
Temperature-Programmed Reaction of C_4 Oxygenates on Unpromoted and K-Promoted ZnCr Oxide in Relation to the Mechanism of the Higher Alcohol Synthesis
Luca Lietti, Pio Forzatti, Enrico Tronconi, and Italo Pasquon 401
Fischer–Tropsch Synthesis over Ru-Group Ib/SiO_2 Catalysts
John C. Kelzenberg and Terry S. King 421
Bimetallic Promotion of Alcohol Production in CO Hydrogenation and Olefin Hydroformylation on RhFe, PtFe, PdFe, and IrFe Cluster-Derived Catalysts
Atsushi Fukuoka, Takuma Kimura, Nobuhiro Kosugi, Haruo Kuroda, Yoshitaka Minai, Yoichi Sakai, Takeshi Tominaga, and Masaru Ichikawa 434
Crotonaldehyde and Methylcrotonaldehyde Hydrogenation over Pt(111) and $Pt_{80}Fe_{20}$(111) Single Crystals
P. Beccat, J. C. Bertolini, Y. Gauthier, J. Massardier, and P. Ruiz 451
Isomerization of *meta*-Xylene over Offretite Catalysts
E. Sastre, A. Corma, F. Fajula, F. Figueras, and J. Perez-Pariente 457
Spillover of CO and H_2 onto Al_2O_3 Surfaces
Bishwajit Sen, John L. Falconer, Tian-Fu Mao, Min Yu, and Raymond L. Flesner 465

Characteristics of Laboratory-Coked Resid HDS Catalyst
Jerry Baumgart, Yanti Wang, William R. Ernst, and J. Donald Carruthers 477

Uncatalysed and MoO_3-Catalysed Carbon–Oxygen Reaction: A Kinetic Study
Isabel F. Silva and Luís S. Lobo 489

Localization and Structure of Carbonaceous Deposits on Reforming Catalysts
D. Espinat, E. Freund, H. Dexpert, and G. Martino 496

Methanol Adsorption and Decomposition on (1 × 1)Pt(110) and (2 × 1)Pt(110): Identification of the Active Site for Carbon–Oxygen Bond Scission during Alcohol Decomposition on Platinum
Jianhua Wang and R. I. Masel 519

Dealumination of Faujasite, Mazzite, and Offretite with Ammonium Hexafluorosilicate
Brigitte Chauvin, Marc Boulet, Pascale Massiani, François Fajula, François Figueras, and Thierry Des Courières 532

The Effect of Sodium on the MoO_3–SiO_2-Catalyzed Partial Oxidation of Methane
Nicholas D. Spencer, Carmo J. Pereira, and Robert K. Grasselli 546

Oxidation of Carbon Monoxide over Palladium on Zirconia Prepared from Amorphous Pd–Zr Alloy. I. Bulk Structural, Morphological, and Catalytic Properties of Catalyst
A. Baiker, D. Gasser, J. Lenzner, A. Reller, and R. Schlögl 555

Low-Temperature Thermal and Photoactivation of TiO_2-Supported Ru, Rh, and Cu Catalysts for CO–NO Reaction
K. Ravindranathan Thampi, P. Ruterana, and M. Grätzel 572

Structure and Catalytic Properties of Silica-Supported Polyoxomolybdates. II. Thermal Behavior of Unsupported and Silica-Supported 12-Molybdosilicic Acid Catalysts from IR and Catalytic Reactivity Studies
Claude Rocchiccioli-Deltcheff, Mohamed Amirouche, Gilbert Hervé, Michel Fournier, Michel Che, and Jean-Michel Tatibouët 591

Relative Reactivities of Alkanes in Catalytic Cracking Reactions
Yury V. Kissin 600

Synthesis of Dimethylamine by Zeolite Rho: A Rational Basis for Selectivity
Lloyd Abrams, David R. Corbin, and Michael Keane, Jr. 610

Reaction Probe Study of the Dual Surface Structure of Graphite-Supported Fe–Rh Catalysts
Herman Durr and Jonathan Phillips 619

Reactions of 3-Methylpentane and 2,3-Dimethylbutane on Aluminosilicate Catalysts
J. Abbot 628

Catalytic Hydrodesulfurization by Molybdenum Nitride
E. J. Markel and J. W. Van Zee 643

The Equilibrium Shape and Surface Energy Anisotropy of Clean Platinum
W. H. Lee, K. R. Vanloon, V. Petrova, J. B. Woodhouse, C. M. Loxton, and R. I. Masel 658

Notes

Methane Oxidation by Oxygen Transported through Solid Electrolyte
Hidetoshi Nagamoto, Katsuhiko Hayashi, and Hakuai Inoue 671

MoS_2-Catalyzed Methanation of CO with H_2S
Arthur J. Frank, Harold A. Dick, John Goral, Arthur J. Nelson, and Michael Grätzel 674

Photoacoustic Spectroscopy Study of CoAPO-5 and CoZSM-5 Molecular Sieves
Kyoung Yul Lee and Hakze Chon 677

Fates of Reactive Intermediates Sequestered by Benzene in the Conversion of Ethylene to Gasoline over H-ZSM-5 Catalyst
Desmond V. Dass and Allan L. Odell 681

The Influence of Olefins on Cracking Reactions of Saturated Hydrocarbons
J. Abbot 684

Reactions of ^{12}C and ^{13}C Acetone Mixtures with a HZSM-5 Zeolite
J. Nováková and L. Kubelková 689

Photocatalytic Oxidation of Multifunctional Organic Molecules. The Effect of an Intramolecular Aryl Thioether Group on the Semiconductor-Mediated Oxidation/Dehydrogenation of a Primary Aliphatic Alcohol
Marye Anne Fox and A. A. Abdel-Wahab 693

Cumulative Subject Index for Volumes 121–126 706

INFORMATION FOR AUTHORS

The *Journal of Catalysis* publishes articles dealing with original studies in heterogeneous and homogeneous catalysis as well as studies relating catalytic properties with chemical processes at surfaces, studies of chemistry of surfaces, and engineering studies related to catalysis. All articles will be published in English.

Submission of Manuscripts. Manuscripts should be sent by registered mail to either of the Editors:

Professor Gary L. Haller
Department of Chemical Engineering
P.O. Box 2159 Yale Station
Yale University
New Haven, Connecticut 06520

Professor Frank S. Stone
School of Chemistry
University of Bath
Bath BA2 7AY, England

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Catalysis* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. Submit manuscript (in English) in triplicate, including the original typewritten copy, with copies of all figures and tables. Originals of micrographs should also be submitted in triplicate for purposes of manuscript reviewing. All material (including tables, reference lists, etc.) should be typed double-spaced on one side of 8.5 × 11-in. white bond paper (with 1-in. margins on all sides). Each page of the manuscript should be numbered. *Page 1* should contain the article title, authors' names (without degrees), affiliations, a running title (abbreviated form of title) not exceeding 45 letters and spaces, and the name and complete mailing address (and telephone and fax numbers, if possible) of the person to whom proof should be mailed. *Page 2* should contain a short abstract.

Authors should use descriptive headings in this order: Abstract, Introduction, Methods, Results, Discussion, Acknowledgments, and References.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

If the manuscript refers to recently submitted manuscripts or papers in press (with the *Journal of Catalysis* or other journals) then please supply three copies of them so that the reviewers can judge the new manuscript in its proper context.

Revised manuscripts should be returned with one copy marked to show where changes have been made.

Notes and *Letters to the Editor* may not exceed 8 double-spaced typewritten manuscript pages (including tables and figures). Accepted Notes will not receive publication priority over articles.

Letters to the Editor will be considered for priority publication under the following conditions: (a) Letters must be related to some statement made in a recently published article in this Journal; (b) in cases of conflicting views on any topic, no more than one Letter from each author will be accepted.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

The SI (Systeme International) system of units will be accepted without editorial change. Authors using other units are encouraged to define them in terms of SI units once in each publication, e.g., in an article where pressures are quoted in Torr to write "1 Torr = 133.3 N m^{-2}." For information concerning SI units, see *Quantities, Units and Symbols for Physical Chemistry,* 4th ed., prepared by I. Mills and published by Blackwell Scientific, Oxford, 1988.

Footnotes should be avoided if possible; but if essential, they should be designated by superscript Arabic numerals (starting with title) in the text.

Tables should be numbered with Arabic numerals in order of mention in the text. They should be typed double-spaced on separate pages. Each table should have a short descriptive caption typed (double-spaced) above the table. Table footnotes (indicated by superscript, lowercase, italic letters) should be typed at the end of the table.

Figures should be numbered with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed double-spaced together on a separate page. All illustrations should be in finished form suitable for reproduction. They should be planned to fit the proportion of the printed page (5.5 × 8 in.; column width, 2-5/8 in.). No figures should exceed 8.5 × 11 in. (21 × 27.5 cm). Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper if used should be ruled in blue. Grid lines that are to show in the final reproduction should be inked in black.

Copies of drawings are not acceptable unless they are high contrast glossy prints. All but the very simplest structures and structural formulas must be designed for direct reproduction. Illustrations in color can be accepted only if the authors defray the cost.

Electron micrographs. Please supply three photographic copies of these so that the reviewers can inspect the fine details they contain.

References to the literature should be cited in the text by italic Arabic numerals in parentheses, set on the text line, and listed numerically at the end of the paper. Abbreviations of journal titles should follow the style used in *Chemical Abstracts' Service Source Index*, 1985. Style and punctuation of references should be in accordance with the following examples:

1. Latef, A., Aissi, C. F., and Guelton, M., *J. Catal.* **119,** 368 (1989).
2. Louis, C., and Che, M., *in* "Reactivity of Solids" (P. Barret and L. C. Dufour, Eds.), Vol. B, p. 1057. Elsevier, Amsterdam, 1985.
3. Pines, H., "The Chemistry of Catalytic Hydrocarbon Conversions." Academic Press, New York, 1981.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased; an order form will be included with proofs.

MICROCHEMICAL JOURNAL

Published under the Auspices of the American Microchemical Society

Editor: **Peter N. Keliher**
Villanova University, Pennsylvania

Associate Editor for Bioanalytical Chemistry
Paul Hemmes, *Angenics, Inc., Cambridge, Massachusetts*

At the Forefront of Modern Analytical Chemistry

Microchemical Journal focuses on microscale chemical analysis including clinically significant methods and procedures. Articles are at the forefront of modern analytical chemistry and cover innovations in techniques down to the finest possible limits.

Research Areas Include

Both organic and inorganic work on

- All types of instrumentation, including clinical instrumentation
- Detection
- Determination
- Environmental analysis
- Forensic analysis
- Preparation
- Purification
- Separation
- Trace and subtrace analysis

Volumes 41–42 (1990), 6 issues
ISSN 0026-265X

In the U.S.A. and Canada: $210.00
All other countries: $267.00

S0090

WHERE MIND MEETS MATTER

Material Concepts in Surface Reactivity and Catalysis

Henry Wise and Jacques Oudar

While recent texts have explored reaction kinetics and mechanisms at interfaces in considerable detail, the physical and chemical properties of the surface in a reacting system are the main topics of this book. The material is presented in an introductory manner useful to the student in materials science, solid-state chemistry, and catalysis as well as to the specialist engaged in research.

May 1990, 260 pages, $65.00
ISBN: 0-12-759940-1

NEW

Interpretation of Metallographic Structures

Third Edition

William Rostoker and Jim Dvorak

This work provides insight into the interpretation of metallographers' and metallurgists' results and an analysis of the view as seen through an optical microscope. It discusses the strengths and weaknesses of various metallographics techniques, such as light optics, electron optics, and microbeam spectroscopy.

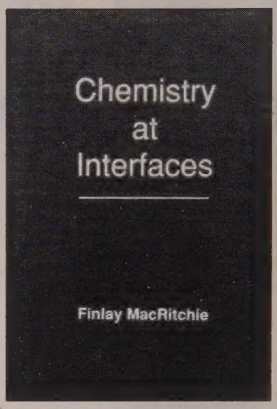
March 1990, 282 pages, $49.95
ISBN: 0-12-598255-0

An Introduction to Dynamic Light Scattering by Macromolecules

Kenneth S. Schmitz

This reference offers a comprehensive study of DLS by macromolecular and polyelectrolyte solutions. With an emphasis on the interpretation of DLS data, the material is organized according to the increasing complexity of the system, ranging from dilute solutions of noninteracting small particles to the more complex multicomponent systems of strongly interacting large particles.

March 1990, 472 pages, $79.95
ISBN: 0-12-627260-3



Chemistry at Interfaces

Finlay MacRitchie

This work provides students and research workers without surface chemistry training with the means to set up and use interfacial techniques and to interpret measurements. For this reason, more emphasis is given to experimental detail and to the associated pitfalls than most other books in the field.

Key Features:

- Contains suggestions for demonstration experiments
- Includes problems and answers where appropriate

February 1990, 283 pages, $49.95
ISBN: 0-12-464785-5
